

VANTIUM ROI APPRAISAL

VALIDATE THE AFFORDABILITY OF LED

The significant energy savings and maintenance-free operation that Vantium will deliver ensures a rapid payback on your investment. Typical payback is within a 2 yr timeframe but with our energy-management and merchandising expertise we can reduce that time even further.

Vantium has also been designed for ease of installation with flexible lengths and innovative clip and fix mounting systems. Our global network of preferred partners will ensure smooth roll-out of LED technology throughout multiple locations.

We have built a sophisticated payback model to calculate projected payback timeframes. Please contact payback@nualight.com to avail of the Nualight Payback Toolkit and we would be happy to discuss the affordability of your specific needs.
